✉ samila.mykola@gmail.com

I'm experienced developer working with complete development cycle: prototyping, creating designs, coding the front-end part, building the app for production, and publishing it on the web/mobile store.
<u>Main stack</u>: **React, Next.js, Javascript, Typescript, HTML5, CSS3, Node.js**

💼 PROFESSIONAL EXPERIENCE

present
Madrid, Spain

Livecom, Frontend Web Developer
<u>Project</u>: SaaS platform for customer support agents

As a sole **React** developer in a team of 3 developers, I built the user-facing part of a multi-language web application for managing live user support, serving over 1000 users daily. The app has clean architectural structure (container/presenter/controller).

<u>My achievements</u>: Delivered high-quality UI components that enhanced the overall user experience, leading to loading times to be 60% faster. Successfully migrated a large-scale codebase of over 10,000 lines of code to a modern version control system, ensuring a smooth transition and minimal disruption to the development process.
<u>Stack</u>: **React, Next.js, TanStack Query, Styled Components, i18next**

2018 – 2023
remote, Spain

Enverus, Frontend Web Developer
As part of a 5-person UI/UX team, I participated in implementation of the front-end for multiple web applications.

<u>My achievements</u>:
- Actively contributed to the company-wide UI/UX library, developing and maintaining over 50 reusable components actively used in company's **React** and **Angular**-based **microfrontend** apps.
- Developed over 30 wireframes and mockups, covering a wide range of user flows and scenarios
- Successfully implemented complex UI components, such as interactive data visualizations powered by **Highcharts JS** and **dynamic forms**.
- Collaborated with the back-end team to successfully integrate 2 APIs into the front-end applications, ensuring seamless data flow and user experience
- Optimized the application's performance, reducing page load times by 10% and improving overall user experience
- Completed 100+ user-requested features and bug fixes, enhancing the overall user experience and satisfaction.

Additionally, I taught UI development to over 20 students at an internal software academy, equipping them with the skills to build high-quality user interfaces. In this role, I also prepared a comprehensive UI development curriculum covering 4 core topics, including wireframing, UI component design, cross-browser compatibility, and performance optimization.
Mentored 2 junior developers, providing guidance and support to help them grow their skills and advance their careers.
<u>Stack</u>: **React, Angular 8, Tailwind, Javascript, LESS, HTML5, Highcharts, REST API, Git, Figma, Agile**

2017 – 2018 Lviv, Ukraine	**TPF Ukraine LLC, Frontend Mobile Developer** <u>Project</u>: Smart home mobile application
	Throughout the development process, I worked closely with a team of designers, marketers, and stakeholders to ensure that the app met all of our requirements and specifications. Once the application was ready for release, I led the process of **publishing the app** on mobile markets.
	<u>My achievements:</u> Selected and implemented a complex technical stack, including **Angular** and **Javascript**, to meet the demanding requirements of the project. Produced a cross-platform mobile application using **Apache Cordova**, supporting **iOS** and **Android** devices. Successfully created a **Scrum** workflow for a team of 4 developers. <u>Stack:</u> **Angular, Material UI, Javascript, SCSS, HTML5, Cordova, REST API, Git, Scrum**
2014 – 2017 Ukraine	**WebMUSE, Wordpress Developer** I was able to deliver websites of different difficulty by participating in almost every step of development. Collaborated with 10+ clients to understand their unique needs and transform their ideas into functional designs. Built more than 20 **custom WordPress themes** from scratch, integrating them seamlessly with the CMS to deliver 20+ successful projects. Conducted training sessions for 15+ clients, enabling them to effectively manage their website content. In addition, I configured and supported an FTP server. <u>Stack:</u> **WordPress, HTML5, CSS3, JavaScript, Lighthouse**

🎓 EDUCATION

Master's degree in software engineering, Galician Academy

🧠 SKILLS

Main stack
- React, Next.js
- Angular
- Javascript, Typescript
- HTML5, CSS3/SCSS
- Styled Components
- Taiwind

Additional skills
- Highcharts, D3.js
- BEM, SMACSS
- Responsive design
- Semantic layout
- Performance optimization
- shadcn

Personal
- Attentive to details
- Communicative
- Responsible
- Team player
